- Extension & Communication
- Animal Production Systems
- Group Extension and Facilitation
- Soil Analytics

Andrew is a Board Director and senior agronomy advisor for Meridian Agriculture. He has extensive background in grassland farming and works in an extension and advisory role focusing on pastures, livestock production and whole farm planning.

Andrew has written, designed, presented and assessed technical trials, training modules and industry projects. Andrew also had key involvement in writing, designing, testing/validating and using a range of soil and tissue analytical services. Andrew contributed technical advice to the Victorian Governments Report into Soil Acidity in 2004.

Andrew provides advice to individual clients and manages a number of farm discussion groups. He is based at our Casterton office in Victoria.
