

CAPABILITY STATEMENT

Esmée de Looff

BSc degree Animal Sciences

– *Wageningen University, the Netherlands*

MSc degree Animal Sciences

– *Wageningen University, the Netherlands*

Areas of Expertise

- Dairy production
- Pasture agronomy
- Soil Management and analysis
- Animal Production Systems
- System modelling

Esmée is a Graduate Pasture & Livestock Consultant based at Meridian Agriculture's Casterton office. She also works alongside other Meridian Ag team members on a range of pasture trials, as well as with clients in the areas of pasture performance, animal production and farm planning.

Her agronomic background has been focused on dairy production, as well as an academic background in research.

Esmée developed a model which analyses nitrogen efficiency in dairy cow diets, which was part of her university research, and she has previous experience in dairy extension services.

In addition, Esmée has hands on experience from working on several farms across Victoria's western district.
